\* Representative Image

Sri Sathya Sai System of Integral Education system is a modern, rational and scientific education system rooted in Indian ethos. It takes the best of both ancient and contemporary learning techniques. Adherence to discipline and appropriate behaviour are the two important aspects that encompass all interactions.

Bhagawan Baba purposefully designed the system of Integral Education so that while students spend 60% of their time on academics (intellectual capacities), they also spend 40% time on the development of other qualities. This enables students to inculcate the virtues of team work, self-reliance, empathy, adaptability, discipline and cooperation.
